**LOT 8783 - Yugoslavian Captured Kar98K Mauser 8mm Mauser Bolt Action Rifle**

### Description

Serial Number: 233. Very good condition for the age of the firearm. Bore is semi bright, appears to have light shallow pitting. Firearm has common handling wear. Steel plate doesn't look to be a perfect fit. All parts appear to be numbers matching besides the forward barrel band (8551). Bolt release lever still has a Wehrmacht Eagle stamp on it.

First starting it's life as a German Mauser Kar98K rifle, after WW II many captured German rifles were later refurbished by Yugoslavia's Preduzece 44( Factory 44) now known as the Zastava. Refurbishment of these captured rifles included, scrubbing any German / Nazi markings from the metal, repairing or replacing parts as need, and then finally reserializing.

This refurbished Yugo Mauser Model 98 features a 24" barrel with a hard to find brass muzzle cap, bladed front sight and rear elevation sight, manual safety, sling studs, and has a hardwood full stock.

**Please note that the matching bayonet is being sold separately in the following Lot# 8783!**
